

**NOTICE OF TEMPORARY OUT OF STOCK FOR ERWINASE®**

Dear Healthcare Professional:

Jazz Pharmaceuticals would like to inform you of the following:

**Summary**

- Jazz Pharmaceuticals (Jazz) is experiencing a shortage of ERWINASE due to an ongoing manufacturing issue that has delayed the scheduled release of an additional batch of the product
- Jazz Pharmaceuticals (Jazz) anticipates that Erwinase will be temporarily out of stock
- Jazz is working to remedy this situation as quickly as possible to avoid disruption of the care you provide for your patients, and we continue to explore mitigation measures.
- Erwinase is manufactured by a single and independent source, Porton BioPharma Limited (PBL), and there are no alternative sources. The manufacturer continues to focus on addressing the global supply challenge through increased production, including additional shift work and process improvements.
- We have informed local regulatory authorities and are collaborating with local regulatory authorities on a country-by-country basis to explore mitigation measures. Jazz anticipates that mitigation measures will reduce the time of a supply disruption although the duration of this will vary country-by-country.

We recognize that Erwinase is the only treatment for patients with acute lymphoblastic leukemia (ALL) who have experienced hypersensitivity to *E. Coli*-derived asparaginase treatments, and our top commitment is to ensure seamless care of patients with transparent, rapid and efficient resolution of any disruption.

Jazz is working to remedy this situation as quickly as possible and will inform you when supply is available.

While supply is available, we will continue to prioritize supply for customers placing orders for Erwinase for the immediate use by patients who are currently undergoing treatment or are initiating treatment.

We will notify you of any updates as we have more information on this situation. If you have any questions regarding product availability or the status of the situation, please contact:
