## Description

The Clinic Network is one of the largest providers of out-of-hospital pain management services in Canada. We operate out of 16 clinics plus 10 affiliates across Canada and specialize in chronic pain, rheumatology and other allied health services with a growing roster of specialists, physicians and nurse practitioners. As such, we have also become experts in medicinal cannabis as an alternative to traditional opioids. The Clinic Network has developed a CCCEP approved cannabis education course that also allows for Patient Support Services so that the pharmacist can be compensated for their consultation time with patients on a fee-for-service basis.

## Message for Pharmacy

We believe that pharmacists are among the most accessible and trusted health care professionals and as such, are in a unique position to establish a major presence in the circle of care for patients suffering with chronic pain, among other ailments. Although we offer many physical services to aid in chronic headaches, knee, shoulder, back and neck pain, osteoarthritis, degenerative disc disease, fibromyalgia, degenerative disc disease, arthritis and post trauma/MVA pain etc., we also want to help pharmacists navigate the new frontier of medical cannabis as an alternative to traditional opioids by enabling both in-depth pharmacist education and patient consultations. It's increasingly important for pharmacy to

become the neighbourhood professional for medical cannabis education. We're already working with thousands of pharmacists across Canada and we'd really like to partner up with you!
