Subject: Natural health products listed in NAPRA's National Drug Schedules

This letter is to inform Neighbourhood Pharmacy Association of Canada of important changes that will impact the conditions of sale of natural health products (NHPs) across Canada.

The National Association of Pharmacy Regulatory Authorities (NAPRA) is updating its policy on and approach to NHPs in NAPRA's National Drug Schedules (NDS) with the best interest of the public as its first and foremost concern.

**NAPRA will be removing NHPs currently listed within the NDS in a stepwise, risk-based approach:**

- 1) Effective January 2, 2020: NHPs currently listed within the Unscheduled category and within Schedule III will be removed from the NDS**
- 2) Effective January 2, 2022: NHPs currently listed within Schedules I and II will be removed from the NDS**

All products with a Natural Product Number (NPN) or Drug Identification Number-Homeopathic Medicine (DIN-HM) from Health Canada will be considered outside the scope of NAPRA's National Drug Schedules.

NAPRA's NDS were developed before Health Canada began regulating the sale of NHPs in Canada. When the *Natural Health Products Regulations* came into force in 2004, many products that were included in the NDS became re-classified as NHPs by Health Canada.

**Members/Membres**

Alberta College of Pharmacy  
Canadian Armed Forces – Pharmacy Services Division  
College of Pharmacists of British Columbia  
College of Pharmacists of Manitoba

New Brunswick College of Pharmacists  
Newfoundland and Labrador Pharmacy Board  
Government of the Northwest Territories  
Nova Scotia College of Pharmacists  
Government of Nunavut

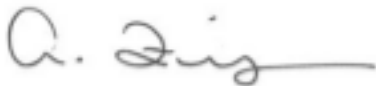

Ontario College of Pharmacists  
Ordre des pharmaciens du Québec  
Prince Edward Island College of Pharmacy  
Saskatchewan College of Pharmacy Professionals  
Community Services – Government of Yukon

NAPRA determined that NHPs were beyond the scope of NAPRA's NDS but agreed to maintain the products that were already in the NDS on an interim basis, until direction could be provided regarding a framework for determining conditions of sale for NHPs in Canada. Since the NHPs in NAPRA's NDS represent only a small percentage of all NHPs currently regulated by Health Canada, the interim measure only addressed the risk of this small subset of NHPs.

NAPRA has determined that this approach is no longer in the best interest of the public and continues to encourage the development of a framework that addresses the risks of the entire class of NHPs.

Information regarding these important changes will be available at [napra.ca](http://napra.ca) as of November 29, 2019, after which we request your support in communicating this decision and timelines with your networks.

Kind regards,

Adele Fifield, O.Ont., CAE, BA, B.Ed  
Executive Director  
National Association of Pharmacy Regulatory Authorities
